

# Set up Apple Pay in Wallet on iPhone

Using Apple Pay can be simpler than using a physical card, and safer too. With your cards stored in the Wallet app, you can use Apple Pay to make secure payments in stores, for transit, in apps, and on websites that support Apple Pay.

*Note:* The availability of Apple Pay and its features varies by country or region. See the Apple Support article [Countries and regions that support Apple Pay](#).

To set up Apple Pay, add your debit, credit, and prepaid cards to Wallet.

(Apple Card and Apple Cash are available only in the U.S.)

## Add a debit or credit card

1. Open the Wallet app  on your iPhone.
2. Tap . You may be asked to [sign in with your Apple ID](#).
3. Do one of the following:
  - *Add a new card:* Tap Debit or Credit Card, tap Continue, then position your card so that it appears in the camera frame, or enter the card details manually.

The card issuer determines whether your card is eligible for Apple Pay and may ask you for additional information to complete the verification process.
